

Louise Seddon, Social Impact Business Partner, GRAHAM Construction – Buildings | South Division

I help to support GRAHAM Construction and our project management teams to create valued lasting impact within the communities where we operate. I support project teams based within the West Midlands.

Together we make a difference, and we achieve this through building lasting relationships to increase industry awareness, support education, increase skills and to create and sustain local employment. Linking through employer engagement within schools, colleges and universities helps industries to bring through new waves of emerging talent one day responsible for shaping industry futures.

I am proud to support Wolverhampton's employer and industry network through my role as an Enterprise Adviser. My role with St Matthias, allows me to work closely to careers leaders, local careers hubs, other industries and employers and new generations of emerging talent.
